1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 21, 2005 has been entered.

Election/Restrictions

3. Newly submitted claim 24 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The invention of newly submitted claim 24 and the invention originally claimed (see for example original claim 11) are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as originally claimed can be made by another and materially different process because the product could be made without shafts and/or mating splines

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution

on the merits. Accordingly, claim 24 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Drawings

4. The replacement drawings filed March 2, 2005 are objected to because they improperly attempt to cancel Figs. 4 & 5. See MPEP § 608.02(t) for the proper procedure for canceling drawings..

5. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

6. Claims 19-23 & 25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant has not pointed out where the following limitations are supported, nor does there appear to be a written description of the limitations in the application as originally filed.

- a. Claims 19 & 25, lines 2 & 3: “[the annular groove of a first shaft is] spaced apart from the axial end [of the first shaft]”. To the contrary, Fig. 2 shows the annular groove 55 at an axial end of the output shaft 24.
- b. Claims 19 & 25, lines 3 & 4: “the annular groove having a first sidewall and a second sidewall that is axially spaced apart from the first sidewall”
- c. Claims 19 & 25, lines 11: “the first and second shafts are slidably . . . connected”
- d. Claims 19 & 25, lines 13: “a U-shaped annular clamp flange”
- e. Claim 19, lines 17 & 18 and claim 25, lines 18 & 19: “the flange seal . . . abutting the first sidewall to thereby axially retain the flange seal to the first shaft in an axial direction”
